Expert Evaluation Questionnaire

Temporal Analysis of Davao City Ordinances Using BERTopic-Based Dynamic Topic Modeling

Research-use draft — no expert responses have been collected in this document.

Thank you for considering this review. We ask whether the topic descriptions and yearly summaries are understandable, useful, and supported by the ordinance material provided. You do not need knowledge of machine learning. You will not be asked to verify technical model scores or to determine legal validity, enforceability, or policy effectiveness.

You will receive eight short topic packets from two systems, identified as X and Y. Please complete Section A once; Sections B–D and E1–E2 for each topic packet; and the final part of Section E once after reviewing both systems. The review may be divided into two sessions. The suggested total time is 60–90 minutes, subject to the preliminary workload check; you may pause, omit an answer, or stop.

Participation will be voluntary. The researchers will explain how responses will be used, stored, and reported before you decide whether to participate. Responses will be reported using reviewer codes or in aggregate; identifying details and contact information will be kept separately. Please do not include confidential client information or other sensitive personal information in your comments.

Researcher contact: _____

Supervisor / institutional contact: _____

Consent and withdrawal information provided separately: _____

Consent: [ ] I have received the study information, had an opportunity to ask questions, and voluntarily agree to participate. [ ] I do not agree. If you do not agree, please stop here.

Reviewer code: _____ Questionnaire version: EV-1.0

Date / session: _____

Section A — Expert Background (complete once)

A1. Relevant field or fields of expertise. Select all that apply.

[ ] Legal practice or legal research

[ ] Legislative drafting, legislative research, or council administration

[ ] Public policy, planning, or public administration

[ ] Work involving local ordinances or their implementation

[ ] Academic work relevant to law, government, or public policy

[ ] Other: _____

A2. Years of relevant experience: _____ years. Less than one year may be indicated. [ ] Prefer not to state.

A3. Familiarity with local ordinances or legislative documents:

[ ] Limited familiarity [ ] Occasional use [ ] Regular use [ ] Extensive use [ ] Prefer not to state

A4. Please briefly describe the work or subject areas relevant to this review. Do not provide confidential examples.

_____

A5. Are there topic areas outside your expertise, or circumstances that might affect your review? Optional.

_____

Topic Review Form — repeat for each packet

Reviewer code: _____ Session: _____

Topic packet ID: _____ System code: [ ] X [ ] Y

Packet version: _____ Draft topic label: _____

Required attachments: draft label and keywords; three assigned examples with source references/full context; two comparison-topic summaries; annual chart/table, document counts, yearly keywords, and a short interpretation.

Missing or unreadable attachments: _____

Rating Guide

Write **one number, 1–5, or NA** for each statement.

1 — Strongly Disagree; 2 — Disagree; 3 — Neither Agree nor Disagree; 4 — Agree; 5 — Strongly Agree.

NA — Not Applicable / **Unable to Assess.** Use NA for insufficient evidence or expertise, not as a neutral rating. Use 1 or 2 for an actual disagreement. You may leave an item blank; an NA reason is helpful.

Judge only the supplied evidence. Labels are drafts, not established legal categories. Coherent legal wording is not necessarily a useful policy theme.

Section B — Topic Quality and Interpretability

Read the draft label, keywords, assigned examples, and the comparison summaries before answering. For B5, assess distinctness only from the comparison topics shown, not from every topic in the collection.

Item	Statement	Response: 1–5 / NA
B1	The topic keywords describe a coherent theme.	_____
B2	The topic label accurately represents the keywords and the sample ordinance text.	_____
B3	The topic is relevant to the content of Davao City ordinances shown in the packet.	_____
B4	The sample sections or document excerpts grouped under this topic are meaningfully related.	_____
B5	This topic is sufficiently distinct from the comparison topics shown.	_____
B6	The topic is understandable and useful for exploring legislative or administrative themes.	_____

Section B comments / suggested label (item and excerpt/comparison ID):

_____

Section C — Accuracy of Model Results (content-based)

Accuracy means source-text support and reasonable grouping, not a test score against predetermined correct topics. Consult the original text/context where needed. Packets will identify detected sections and whole-document fallback excerpts.

Item	Statement	Response: 1–5 / NA
C1	The proposed theme is supported by the original ordinance text made available.	_____
C2	The assigned examples reasonably belong to the proposed topic.	_____
C3	The displayed keywords fairly represent the content of the supplied examples.	_____
C4	The grouping gives a fair picture of the theme without misleading combinations or divisions.	_____

Section C comments: Note any misleading grouping, excessive breadth/narrowness, unrelated text, extraction error, or missing context. Give the example/source ID and suggested correction, or state no concern.

_____

Topic Review Form — continued

Reviewer code: _____ Topic packet ID / version: _____

Scale reminder: 1 Strongly Disagree; 2 Disagree; 3 Neither Agree nor Disagree; 4 Agree; 5 Strongly Agree; NA Not Applicable / Unable to Assess.

Section D — Temporal Trends and Interpretation

Read the 2016–2025 annual chart/table, yearly keywords, source examples, and proposed interpretation. Each source document contributes weight one, divided among its topics. A topic's annual percentage is its share of that year's document weight, **not** a count of ordinances exclusively about it or a measure of city activity. Unassigned text stays in the denominator.

Archive sizes differ: 2025 has 32 modeled source documents. Years are resolved study-year assignments, not necessarily independently rechecked enactment dates. More mentions do not prove policy effectiveness, intent, or impact. Select NA if the data or interpretation are insufficient; do not infer trends from missing information.

Item	Statement	Response: 1–5 / NA
D1	The topic's distribution across years is presented clearly.	_____
D2	The reported changes in topic shares or yearly keywords are supported by the displayed data.	_____
D3	The interpretation of an increasing, decreasing, recurring, or stable pattern is reasonable for the supplied evidence.	_____
D4	The interpretation avoids unsupported claims about policy effectiveness, legislative intent, or real-world impact.	_____

Years, claims, keyword changes, or source examples that need clarification:

_____

_____

Section E — Overall Assessment and Feedback for This Topic

These items concern the supplied research output, not approval of the entire thesis, its software, or all topic assignments.

Item	Statement	Response: 1–5 / NA
E1	Overall, this topic result would be useful for exploring ordinance content within its stated limits.	_____
E2	The packet makes its supporting evidence and limitations clear enough for an informed assessment.	_____

Suggested action for this topic: Optional; select all that apply.

[ ] Retain as presented [ ] Rename [ ] Reconsider the grouping

[ ] Consider merging with another displayed topic [ ] Consider separating into narrower topics

[ ] Recheck assigned examples or source text [ ] Revise the temporal interpretation

[ ] More evidence needed [ ] Other: _____

Which topic/example/year does your suggestion concern, and why?

_____

_____

NA responses: Please give the item ID and reason, if you wish: insufficient material, outside expertise, not applicable, unreadable source, missing context, or other.

Item ID(s) / reason: _____

Section E — Final Comparison and General Feedback (complete once)

Reviewer code: _____ Date: _____

E3. Which systems have you reviewed?

[ ] Both X and Y [ ] X only [ ] Y only [ ] Unable to complete either

If you have not reviewed both, select insufficient information for E4. You may still provide comments about the materials you saw.

E4. Considering the supplied samples, which system's topics were more understandable or substantively meaningful?

[ ] System X [ ] System Y [ ] Both were equally useful

[ ] Neither was useful for the stated purpose [ ] Insufficient information to compare

E5. What is the main reason for your answer? Please refer to specific packets where possible. The samples need not represent identical themes.

_____

_____

E6. What were the major strengths and weaknesses of the supplied results?

Strengths: _____

Weaknesses: _____

E7. Which topics should be reconsidered, renamed, merged, or separated? Identify the packet IDs and explain the proposed change. If no change is suggested, you may say so.

_____

_____

E8. Please identify any incorrect or questionable assignment or temporal interpretation. Include the packet, source/example, and year if relevant. Do not provide confidential information.

_____

_____

E9. What would improve the usefulness, clarity, or source support of the results?

_____

_____

E10. Is there anything else that should limit how your judgments are interpreted? Optional; for example, an unfamiliar topic area or missing materials.

_____

Thank you. Your feedback will be considered together with automated evaluation and source checks. Favorable ratings will not be presented as proof that every topic or assignment is objectively correct.
